Once upon a time, the myth goes, it wasn't even a proper island. It was the «Adelos Nisos», the invisible island that floated here and there in the Aegean. And if it escaped this fate and acquired a glorious name, it was thanks to one of the many whims of the king of the gods.

Zeus fell in love with the goddess Leto, and the result of their love was a tumultuous pregnancy and a painful nine-day childbirth. When the time came for Leto to give birth, Hera did everything in her power to prevent her from finding a place to

deliver. Wherever she went, she was driven away out of fear of Hera's retaliation. Zeus then implored his brother Poseidon to lend the floating island he possessed, which was then called Asteria and Ortygia. In return, he gave him Calabria. Poseidon placed the wandering rock in the center of the Aegean and anchored it with four diamond chains, transforming the «invisible» island into «Delos», which means visible. The surrounding islands that encircle Delos were named the Cyclades.

Since then, Delos remained stable and never moved again, except for one occasion. When Datis, the general of Artaphernes, sought to invade Greece, not only did he not harm Delos, but he also offered 300 talents of frankincense to the Delian Apollo temple! It was only then that the island trembled once. All these stories about the moving island are due to frequent seismic activity, as Pausanias tells us. In his time, a part of the island was called «Tremor».

On this island, in its sacred lake, beneath a palm tree, the hunted Leto gave birth to Artemis and Apollo after nine days of agony. As soon as Apollo was born, the place filled with flowers and light, nature awakened, and Leto ensured that the island became rich and respected by the whole world, just as she had promised. Thus, the small, arid, and barren Delos gained the glory that accompanied it for many millennia.

Delos covers an area of only 3.43 square kilometers. It has only one mountain mass called Kynthos, slightly higher than 100 meters. It also has only one river, Inopos, which is only 1,200 meters long. The ancients said that it always flooded in the same year as the Nile, as if connected to it by some mysterious underwater currents.

Etymologically, the name «Adelon» derives from the word «adelos», which means hidden.

**Μ**ια φορά κι έναν καιρό, λέει ο μύθος, δεν ήταν καν σωστό νησί. Ήταν η «Άδηλος Νήσος», το αόρατο νησί που έπλεε εδώ κι εκεί στο Αιγαίο. Κι αν ξέφυγε από αυτή τη μοίρα και απέκτησε ένδοξο όνομα, ήταν χάρη σε μια από τις πολλές ιδιοτροπίες του βασιλιά των θεών.

Ο Δίας ερωτεύτηκε τη θεά Λητώ και το αποτέλεσμα του έρωτά τους ήταν μια ταραχώδης εγκυμοσύνη και ένας επώδυνος τοκετός εννέα ημερών. Όταν ήρθε η ώρα να γεννήσει η Λητώ, η Ήρα έκανε ό,τι περνούσε από το χέρι της για να την αποτρέψει από το να βρει πού να γεννήσει. Όπου κι αν πήγαινε, την έδιωχναν από τον φόβο των αντιποίνων της Ήρας. Τότε ο Δίας παρακάλεσε τον αδελφό του Ποσειδώνα να δανείσει το πλωτό νησί που κατείχε, το οποίο τότε ονομαζόταν Αστέρια και Ορτυγία.

Σε αντάλλαγμα, του έδωσε την Καλαβρία. Ο Ποσειδώνας τοποθέτησε τον περιπλανώμενο βράχο στο κέντρο του Αιγαίου και τον αγκυροβόλησε με τέσσερις διαμαντίνιες αλυσίδες, μετατρέποντας το «αόρατο» νησί σε «Δήλο», που σημαίνει ορατή. Τα γύρω νησιά που περικυκλώνουν τη Δήλο ονομάστηκαν Κυκλάδες.

Έκτοτε, η Δήλος παρέμεινε σταθερή και δεν μετακόμισε ποτέ ξανά, εκτός από μία περίπτωση. Όταν ο Δάτης, ο στρατηγός του Αρταφέρνη, επεδίωξε να εισβάλει στην Ελλάδα, όχι μόνο δεν έκανε κακό στη Δήλο, αλλά πρόσφερε και 300 τάλαντα λιβάνι στον ναό του Δηλίου Απόλλωνα! Μόνο τότε το νησί έτρεμε μια φορά. Όλες αυτές οι ιστορίες για το κινούμενο νησί οφείλονται στη συχνή σεισμική δραστηριότητα, όπως μας λέει ο Πausανίας. Στην εποχή του, ένα μέρος του νησιού ονομαζόταν «Τρέμορ».

Σε αυτό το νησί, στην ιερή του λίμνη, κάτω από έναν φοίνικα, η κυνηγημένη Λητώ γέννησε την Άρτεμη και τον Απόλλωνα μετά από εννιά μέρες αγωνίας. Μόλις γεννήθηκε ο Απόλλωνας, ο τόπος γέμισε λουλούδια και φως, η φύση ξύπνησε και η Λητώ φρόντισε να γίνει το νησί πλούσιο και σεβαστό από όλο τον κόσμο, όπως ακριβώς είχε υποσχεθεί. Έτσι, η μικρή, άνυδρη και άγονη Δήλος απέκτησε τη δόξα που τη συνόδευε για πολλές χιλιετίες.

Η Δήλος έχει έκταση μόλις 3,43 τετραγωνικά χιλιόμετρα. Έχει μόνο έναν ορεινό όγκο που ονομάζεται Κύνθος, λίγο ψηλότερα από 100 μέτρα. Έχει επίσης μόνο ένα ποτάμι, τον Ινωπό, που έχει μήκος μόλις 1.200 μέτρα. Οι αρχαίοι έλεγαν ότι πλημμύριζε πάντα την ίδια χρονιά με τον Νείλο, σαν να τον συνδέουν κάποια μυστηριώδη υποθαλάσσια ρεύματα.

Ετυμολογικά, το όνομα «Adelion» προέρχεται από τη λέξη «adelos», που σημαίνει κρυμμένος.
